

TrailMaster MINI / MID go kart oil change instruction

1. the OHV engine has one oil drain plug as indicated the picture, use wrench to open it and drain the engine oil:

2. Close the drain plug when all the engine oil has been drained out, use hand to open the oil gage stick as indicated in the picture:

3. Refill engine oil SAE 10W-40 (Note: only engine oil for GASOLINE engine can be used!) 1 to 1.25 pint into the engine through the oil gage hole. Check the oil level on the oil gage stick to make sure the oil level inside the engine is correct.
4. Close the oil gage stick (there is a seal ring on the oil gage stick, don't forget to put the seal ring back!)

5. There is no separate gear/transmission oil change for this type of engine.
